

Professional Incident Investigation

# Incident Investigation Course

## Setup Instructions

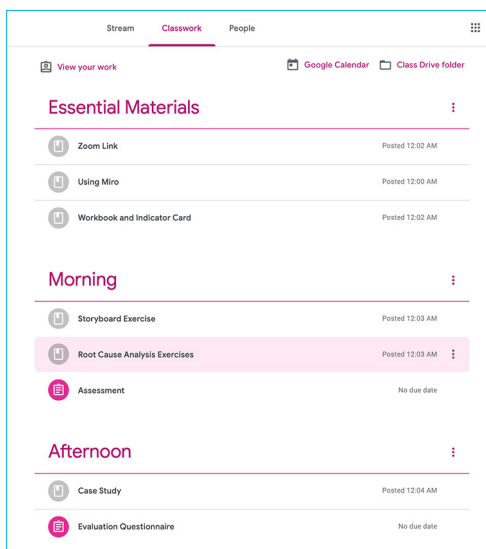

## Technical Requirements

1. Each delegate is required to have their own computer.
2. Broadband Speed check - Visit <https://www.speedtest.net/> - click 'Go' and wait for your results. Minimum download speed requirements are 15Mbps (suggested minimum upload of 5Mbps). If the download speed is less than 15Mbps, please contact [info@kelvintopset.com](mailto:info@kelvintopset.com).
3. This virtual Investigation Course works on any internet browser, e.g. Chrome, Safari, Edge.

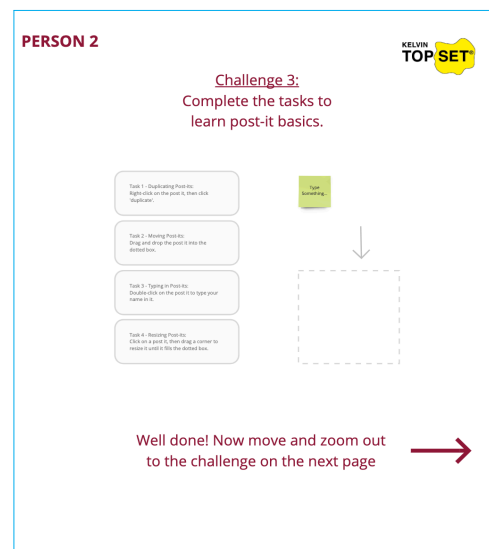

## Pre-Course Preparatory Tasks (c.25 mins in total)

Each delegate is required to complete some pre-course exercises. These include:

1. Watching the Kelvin TOP-SET Overview Video
2. Logging in to the Cloud Classroom
3. Carrying out a familiarisation task in Miro (Kelvin TOP-SET's collaborative platform)

Cloud Classroom

Miro familiarisation

Full details of these (along with the Zoom meeting joining instructions) will be sent in a welcome email 48 hours prior to the course.

Please note that the Pre-Course Preparatory Tasks are essential to an optimal user experience for all delegates and are therefore mandatory.
