

# Introductory Investigator Course

Our renowned incident investigation course taught in a breakthrough online learning environment.

## Key benefits

- Convenient and cost-effective training; no need for travelling to a course venue, and training can fit around existing schedules.
- Delegates gain a basic understanding of the Kelvin TOP-SET Incident Investigation Method, and the confidence to contribute to an investigation.
- Provides practical and interactive opportunities to practise skills throughout the day at key points of the TOP-SET Process.
- Delegates gain an understanding of how to investigate incidents using digital tools; ideal for investigations with remote investigation teams or where incident-site access is not possible.
- Develops effective teamwork skills and co-operation in the investigation process.

# Overview

This online, tutor-led TOP-SET course is designed for anyone involved in incident investigations and problem solving, and who may be part of a larger incident investigation team.

Taught in the Kelvin TOP-SET Cloud Classroom, this highly interactive course is an introduction to the easy-to-follow 6-step TOP-SET Incident Investigation and Root Cause Analysis Method for investigating incidents.

Collaborative working in the digital arena combined with practical case studies embeds learning and prepares delegates for real-life investigation situations and becoming a more effective part of an incident investigation team.

## Participants gain access to:

- TOP-SET Digital Charts for use with online collaboration tools, e.g. Miro, Microsoft Whiteboard, Jamboard etc. (no additional software required)
- The TOP-SET App

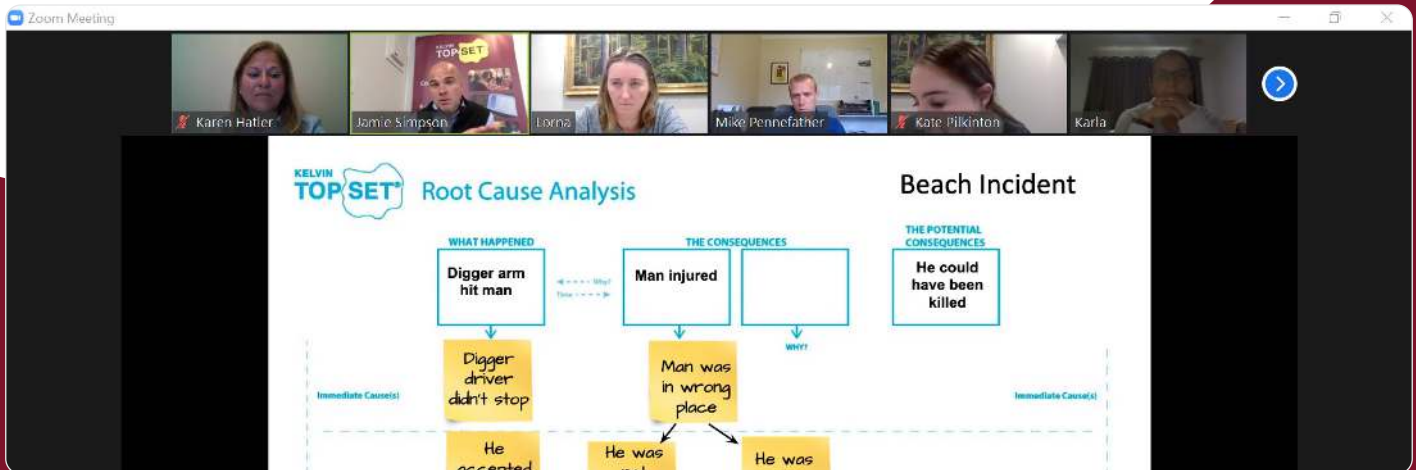

## Course details

Taught online by an experienced tutor

- Requires computer and internet download speed of 15Mbps (minimum)

### Certification

Kelvin TOP-SET Introductory Investigator and CPD (7 hours)

**“I had preconceptions about online training as I felt I wouldn’t get enough interaction. Well, I was wrong. The interaction level was excellent and far exceeded my expectations.”**

Daniel Duggan, Production Supervisor – Repsol Sinopec
